

Rep. Braley announced today that he secured \$187,500 to purchase emergency generators for the City of Camanche.

Washington, DC - Today, Rep. Bruce Braley secured \$187,500 to provide emergency generators for the City of Camanche. The funding was included in the FY2010 Homeland Security Appropriations bill, which was passed today by the House Appropriations Committee.

Specifically, the \$187,500 will be used to design and construct emergency generators for Camanche's police and fire departments. These generators will allow Camanche's first responders to continue operating during natural disasters and power outages.

"Preparing for natural disasters today will help protect area families and businesses in the future," Braley said. "I'm proud to secure funding that will keep Camanche safe and ensure that first responders have the resources necessary to help during a natural disaster."

The Homeland Security Appropriations bill now moves to the full House for consideration.
